DETAILED ACTION

This office action is a response to the amendment filed on 2/7/2007.

Election/Restrictions

1. Since generic claim is allowable, claims 6 and 7, directed to the manufacturing method for a probe card, previously restricted from the election of species mailed on 7/14/2006, are now subject to bring rejoined. Claims 1-7 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as a process of eliminating the first sacrificial substrate after the first contact is coupled to the signal transmission line in the first contact joining step. The closest reference of Fujita et al. or Yamamoto et al. teaches all of the limitations including a process of attaching the first surface of the first sacrificial substrate to the base substrate and joining the first contact to the signal transmission line and attaching the first surface of the second sacrificial substrate to the base substrate and joining the second contact to the signal transmission line. However, both Fujita et al. or Yamamoto et al. fail to disclose the claimed invention to remove the first sacrificial substrate after the first contact is coupled to the signal transmission line in the first contact joining step. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-7 and 9-13 are allowed.
